Community mission is the active involvement of Christians in their communities, living God's Kingdom through addressing the needs around us. There are already many community action initiatives in Bristol but the potential exists both for more and for better linking of those that there are. These mornings will look at what is necessary to set up a social action project within a Christian framework. They will also provide an opportunity for those already engaged in social action ventures to reflect on their activities and to network with other organisations.
